

How FAR is an hour?

IS it 4 miles or 400? It depends on how you travel! When grandpa was a boy, he spent most of a Saturday getting to town and back with a horse and buggy.

But today he can step into an airliner and cross the country before the sun goes down.

To the thousands of people who travel by air, miles are merely minutes... oceans and continents, hours.

Today, the Airlines maintain the fastest passenger, mail and cargo schedules in the

world — serving hundreds of U. S. cities and scores of foreign countries.

For the Army and Navy, the Airlines also operate an armada of transport planes that reduce *surface days* to *air hours* in supplying every fighting front.

Yet the 180-mile-an-hour speed on which the Airlines base their present schedules will probably seem slow indeed, when the giant transports of the future lift their wings to global skies.

What that speed will be—how far it will take you in 60 minutes—can only be conjectured by this fact: Our aircraft builders are now making military planes that fly more than 400 miles an hour—*7 miles a minute!*

When you travel by Air *make reservations early; please cancel early if plans change.* When you use Air Express *speed delivery by dispatching shipments as soon as they're ready.* Air Transport Association, 1515 Massachusetts Ave., N. W., Washington, D. C.
